Personal Profile

BSc (Hons) Computer Science graduate with strong foundations in software engineering, machine learning, and data-driven systems. Developed practical solutions including a Fake News Detection model (~98% accuracy) and a Blockchain-based Event Ticketing D-App.

Combines technical expertise with hands-on experience in fast-paced restaurant environments, offering a strong understanding of real-world system demands and performance under pressure.

Seeking a Graduate Software Engineer / AI-focused role to build scalable, high-impact solutions and contribute to data-driven innovation.

Technical Skills

- Programming fundamentals: Python, Java, C, C++, C#.
- Object-Oriented Programming (OOP).
- Data structures and algorithms.
- Database fundamentals: SQL, relational databases.
- Software development lifecycle (SDLC).
- Version control: Git.
- Operating Systems: Windows configuration and troubleshooting.
- Problem analysis, debugging, and logical reasoning.

Core Skills

- Analytical thinking and structured problem-solving.
- Team leadership, supervision, and staff training.
- Strong communication and stakeholder coordination.

- Time management and ability to work under pressure.
 - Process adherence, compliance, and attention to detail.
-

TECHNICAL PROJECTS

Fake News Detection on Social Media (NLP & Machine Learning)

- Developed a machine learning model achieving ~98% accuracy in classifying fake vs real news
- Implemented end-to-end NLP pipeline including text preprocessing, tokenization, and feature extraction (TF-IDF)
- Trained and evaluated classification models (e.g., Logistic Regression / Naive Bayes) using precision, recall, and F1-score
- Improved model reliability by addressing data imbalance and analyzing bias in training data
- Tools: Python, Scikit-learn, Pandas, NLP.

Blockchain Event Ticketing D-App (NFT-Based System)

- Built a decentralized ticketing system to prevent fraud and duplicate ticket sales using blockchain technology
- Implemented NFT-based ticket ownership with smart contracts for secure validation and transfer
- Designed system logic to ensure transparency, immutability, and user trust
- Explored real-world applications of blockchain in event management systems
- Tools: Solidity, Web3, Ethereum

Database-Driven Application (SQL System)

- Designed and implemented a relational database system for structured data management
 - Developed optimized SQL queries for data retrieval, filtering, and updates
 - Applied normalization techniques to improve data integrity and reduce redundancy
 - Ensured efficient data handling and system performance
 - Tools: SQL, Relational Databases
-

PORTFOLIO

View live projects, case studies, and technical implementations:

[Portfolio: Muhammad Junaid Mir](#)

Volunteer Experience

IT Support Volunteer

CatBytes, London, UK

Feb 2025 – Apr 2025

- Provided one-to-one and small-group IT support to 20+ users, primarily older adults and beginners, across weekly digital inclusion sessions.
 - Assisted users with Windows OS navigation, email setup, online accounts, and basic cybersecurity awareness.
 - Performed basic system maintenance including software updates, peripheral configuration, and troubleshooting hardware/software issues.
 - Explained technical concepts clearly to non-technical users, improving confidence and digital independence.
 - Cooperated with coordinators and volunteers to deliver structured and inclusive IT support services.
-

Employment History

Team Leader

Chopstix Noodle Bar, London, UK

Dec 2023 – Present

- Managed high-volume operations, developing strong problem-solving and decision-making skills.
- Optimized workflows and team coordination under pressure, improving service efficiency.
- Led and supervised team members to deliver efficient daily operations.
- Supported sales performance and customer service standards.
- Managed stock control, supplier deliveries, and inventory accuracy.
- Implemented controls to minimize wastage, damage, and shrinkage.

Chef

Williamson's Tavern, London, UK

Oct 2025 – Feb 2026

- Prepared and cooked pub dishes in line with menu and quality standards.
- Maintained food hygiene and HACCP compliance.
- Managed stock rotation, deliveries, and waste control.
- Supported high-volume service during peak periods.

- Coordinated with front-of-house staff on dietary requirements.
- Ensured kitchen cleanliness and equipment safety.

Retail Associate

TK Maxx, London, UK

Jun 2024 – Sep 2024

- Maintained stock levels and visual merchandising standards.
- Replenished shelves and organized stockroom inventory.
- Processed customer transactions accurately.
- Responded to customer enquiries and provided product recommendations.
- Reported operational issues to management.

Assistant Store Manager

Pines and Needles, London, UK

Oct 2023 – Dec 2023

- Assisted in managing daily store operations and staff supervision.
- Supported sales targets and customer engagement.
- Oversaw stock deliveries and inventory control.
- Reduced losses through effective waste and damage management.
- Trained new staff members.

Education

BSc (Hons) Computer Science

University of East London, London, UK

Sep 2023 – May 2026

Final Year Dissertation: Fake News Detection using NLP (Machine Learning-based, ~98% accuracy)

Key Modules: Machine Learning, Data Structures, Databases, Software Engineering

Diploma in Computer Programming

Pakistan Institute of Modern Studies, Islamabad, Pakistan

Oct 2021 – Sep 2022

A-Levels (Equivalent)

Manjanbazam Cadet College, Ghazi, Pakistan

Apr 2017 – Jun 2021

Achievements

- National Financial Literacy Program for Youth.
 - Community Immunity Ambassador – Muhammad Bin Rashid University.
 - Sports Participation Certificate.
-

Interests

Reading, problem-solving, technology exploration, social networking.
