Personal Profile

Final-year BSc(Hons) Computer Science student with proven leadership, operational, and customer-focused experience across retail and hospitality roles. Demonstrates strong logical thinking, problem-solving ability, and accountability gained through team leadership, stock control, compliance, and high-pressure environments. Actively seeking a Graduate IT / Software role where technical foundations, analytical skills, and transferable management experience can be applied and developed within a professional technology-driven organization.

Key Skills

- Analytical thinking and structured problem-solving.
 - Team leadership, supervision, and staff training.
 - Strong communication and stakeholder coordination.
 - Time management and ability to work under pressure.
 - Process adherence, compliance, and attention to detail.
 - Basic programming and computer systems knowledge.
 - Windows OS setup, troubleshooting, and user support.
 - Microsoft Office (Word, Excel, PowerPoint).
 - Customer service and service delivery excellence.
 - Languages: English, Urdu, Hindi, Punjabi.
-

Technical Skills

- Programming fundamentals: Python, Java, C, C++, C#.
- Object-Oriented Programming (OOP).
- Data structures and algorithms.

- Database fundamentals: SQL, relational databases.
 - Software development lifecycle (SDLC).
 - Version control: Git.
 - Operating Systems: Windows configuration and troubleshooting.
 - Problem analysis, debugging, and logical reasoning.
-

Academic Projects

Fake News Detection on Social Media (NLP-Based)

- Designed a prototype system to classify news as real or fake using Natural Language Processing techniques.
- Applied text preprocessing, feature extraction, and supervised learning concepts.
- Evaluated model performance using accuracy, precision, recall, and F1-score.
- Developed strong understanding of data quality, bias, and ethical considerations in AI systems.

Database-Driven Application

- Designed and implemented a small-scale relational database using SQL.
- Created queries for data retrieval, filtering, and updates.
- Applied normalization principles and basic data integrity constraints.

Computer Systems and Networking.

- I studied computer architecture, operating systems, and basic networking principles.
 - Gained practical exposure to system configuration, troubleshooting, and security awareness.
-

Volunteer Experience

IT Support Volunteer

CatBytes, London, UK

Feb 2025 – Apr 2025

- Provided one-to-one and small-group IT support to 20+ users, primarily older adults and beginners, across weekly digital inclusion sessions.
- Assisted users with Windows OS navigation, email setup, online accounts, and basic cybersecurity awareness.

- Performed basic system maintenance including software updates, peripheral configuration, and troubleshooting hardware/software issues.
 - Explained technical concepts clearly to non-technical users, improving confidence and digital independence.
 - Cooperated with coordinators and volunteers to deliver structured and inclusive IT support services.
-
